

PUBLICACIONES DE LOS ÚLTIMOS 10 AÑOS CON INVESTIGADORES DE LA EUITA.

Área de Física

R. Perriñez y J. Reguera (1999). A numerical model to simulate the tidal dispersion of radionuclides in the English Channel. *Journal of Environmental Radioactivity* 43, 51-64.

A. Martínez-Aguirre y R. Perriñez (1999). Distribution of natural radionuclides in sequentially extracted fractions of sediments from a marsh area in southwest Spain: U-isotopes. *Journal of Environmental Radioactivity* 45, 67-80.

R. Perriñez (1999). Three dimensional modelling of the tidal dispersion of non conservative radionuclides in the marine environment: application to $^{239,240}\text{Pu}$ dispersion in the eastern Irish Sea. *Journal of Marine Systems* 22, 37-51.

R. Perriñez (2000). Modelling the physico-chemical speciation of plutonium in the eastern Irish Sea. *Journal of Environmental Radioactivity* 49, 11-33.

R. Perriñez (2000). Modelling the tidal dispersion of ^{137}Cs and $^{239,240}\text{Pu}$ in the English Channel. *Journal of Environmental Radioactivity* 49, 259-277.

A. Martínez-Aguirre y R. Perriñez (2001). Sedimentary speciation of U and Th isotopes in a marsh area at the southwest of Spain. *Journal of Radioanalytical Nuclear Chemistry* 247, 45-52.

R. Perriñez (2001). ^{226}Ra in waters of an estuarine system formerly affected by direct discharges of wastes from a phosphate fertilizer processing complex. *Journal of Radioanalytical Nuclear Chemistry* 247, 453-456.

R. Perriñez y A.J. Elliott (2002). A particle tracking method for simulating the dispersion of non conservative radionuclides in coastal waters. *Journal of Environmental Radioactivity* 58, 13-33.

R. Perriñez (2002). Modelling the suspended matter dynamics in a marine environment using a three dimensional sigma coordinate model: application to the eastern Irish Sea. *Applied Mathematical Modelling* 26, 583-601.

R. Perriñez (2002). The enhancement of ^{226}Ra in a tidal estuary due to the operation of fertilizer factories and redissolution from sediments: experimental results and a modelling study. *Estuarine, Coastal and Shelf Science* 54, 809-819.

R. Perriñez (2002). Modelling the physico-chemical speciation of plutonium in the eastern Irish Sea: a further development. *Journal of Environmental Radioactivity* 62, 263-276.

R. Perriñez (2003). Redissolution and long-term transport of radionuclides released from a contaminated sediment: a numerical modelling study. *Estuarine, Coastal and Shelf Science* 56, 5-14.

R. Perriñez (2003). Kinetic modelling of the dispersion of plutonium in the eastern Irish Sea: two

approaches. *Journal of Marine Systems* 38, 259-275.

R. El-Mrabet, J.M. Abril, R. Perriñez, G. Manjón, R. García-Tenorio, A. Delgado y L. Andreu (2003). The effect of phosphogypsum amendments on radionuclide content in drainage water and marsh soils from SW Spain. *Journal of Environmental Quality* 32, 1262-1268.

R. Perriñez (2004). Testing the behaviour of different kinetic models for uptake-release of radionuclides between water and sediments when implemented on a marine dispersion model. *Journal of Environmental Radioactivity* 71, 243-259.

R. Perriñez (2004). On the sensitivity of a marine dispersion model for non conservative radionuclides to input parameters. *Journal of Environmental Radioactivity* 73, 101-115.

A. Absi, M. Villa, G. Manjón, H.P. Moreno y R. Perriñez (2004). Self-cleaning in an estuarine area formerly affected by ²²⁶Ra anthropogenic enhancements. *The Science of the Total Environment* 329, 183-195.

R. Perriñez (2004). The dispersion of ¹³⁷Cs and ^{239,240}Pu in the Rhone River plume: a numerical model. *Journal of Environmental Radioactivity* 77, 301-324.

R. Perriñez (2004). A particle-tracking model for simulating pollutant dispersion in the Strait of Gibraltar. *Marine Pollution Bulletin* 49, 613-623.

R. Perriñez (2005). Modelling the transport of suspended particulate matter by the Rhone River plume (France). Implications for pollutant dispersion. *Environmental Pollution* 133, 351-364.

R. Perriñez (2005). GISPART: a numerical model to simulate the dispersion of contaminants in the Strait of Gibraltar. *Environmental Modelling and Software* 20, 797-802.

R. Perriñez (2005). Measuring and modelling temporal trends of ²²⁶Ra in a Spanish estuary affected by the phosphate industry. *Marine Environmental Research* 60, 35-49.

R. Perriñez, A. Absi, M. Villa, G. Manjón y H.P. Moreno (2005). Self-cleaning in an estuarine area formerly affected by ²²⁶Ra anthropogenic enhancements: numerical simulations. *The Science of the Total Environment* 339, 207-218.

R. Perriñez (2005). Modelling the dispersion of radionuclides by a river plume. Application to the Rhone River. *Continental Shelf Research* 25, 1583-1603.

R. Perriñez (2005). An operative Lagrangian model for simulating radioactivity dispersion in the Strait of Gibraltar. *Journal of Environmental Radioactivity* 84, 95-101.

R. Perriñez (2005). Modelling the flux of radionuclides from the Rhone River into the Mediterranean Sea. *Radioprotection* 40, 601-606.

M. Iosjpe and R. Perriñez (2005). Redissolution of cesium and plutonium from Irish Sea sediments: a comparison between different modelling approaches. *Radioprotection* 40, 607-612.

R. El-Mrabet, J.M. Abril, A. Delgado, G. Manjón y R. Perriñez (2005). Evaluation of the radioactive impact of the phosphogypsum wastes used as amendment in agriculture soils. *Radioprotection* 40, 335-341.

A. Baeza, E. García, C. Miró y R. Perriñez (2006). Modelling the spatio-temporal evolution of ^3H in the waters of the River Tagus. *Journal of Environmental Radioactivity* 86, 367-383.

L. Monte, L. Hakason, R. Perriñez, G. Laptev, M. Zheleznyak, V. Maderich y V. Koshebutsky (2006). Experiences from a case study of multi-model application to assess the behaviour of pollutants in the Dnieper-Bug estuary. *Ecological Modelling* 195, 247-263.

L. Monte, R. Perriñez, S. Kivva, G. Laptev, G. Angeli, H. Barros y M. Zheleznyak (2006). Assessment of state-of-the-art models for predicting the remobilisation of radionuclides following the flooding of heavily contaminated areas: the case of Prypiat River floodplain. *Journal of Environmental Radioactivity* 88, 267-288.

R. Perriñez (2006). Modelling surface radioactive spill dispersion in the Alborán Sea. *Journal of Environmental Radioactivity* 90, 48-67.

R. Perriñez, A. Absi, M. Villa, H.P. Moreno y G.

Manjón (2007). Modelling ^{226}Ra behaviour in a Spanish estuary affected by the phosphate industry. *Journal of Radioanalytical Nuclear Chemistry* 274, 293-299.

R. Perriñez y A. Pascual-Granged (2007). A rapid response model for simulating radioactivity dispersion in the Strait of Gibraltar. *Journal of Radioanalytical Nuclear Chemistry* 274, 301-306.

R. Perriñez (2007). Chemical and oil spill rapid response modelling in the Strait of Gibraltar-Alborán Sea. *Ecological Modelling* 207, 210-222.

R. Perriñez y A. Pascual-Granged (2008). Modelling surface radioactive, chemical and oil spills in the Strait of Gibraltar. *Computers and Geosciences* 34, 163-180.

R. Perriñez (2008). A modelling study on ^{137}Cs and $^{239,240}\text{Pu}$ behaviour in the Alborán Sea, western Mediterranean. *Journal of Environmental Radioactivity* 99, 694-715.

L. Monte, P. Boyer, J. Brittain, N. Goutal, R. Heling, A. Kryshev, I. Kryshev, G. Laptev, M. Luck,

R. Perriñez, F. Siclet, M. Zheleznyak (2008). Testing models for predicting radionuclide behaviour in aquatic systems. *Applied Radiation and Isotopes* 66, 1736-1740.

J.M. Abril, R. García-Tenorio, R. Perriñez, S.M. Enamorado, L. Andreu y A. Delgado (2009). Occupational dosimetric assessment (inhalation pathway) from the application of phosphogypsum in agriculture in South West Spain. *Journal of Environmental Radioactivity* 100, 29-34.
